Other Protected Open Space

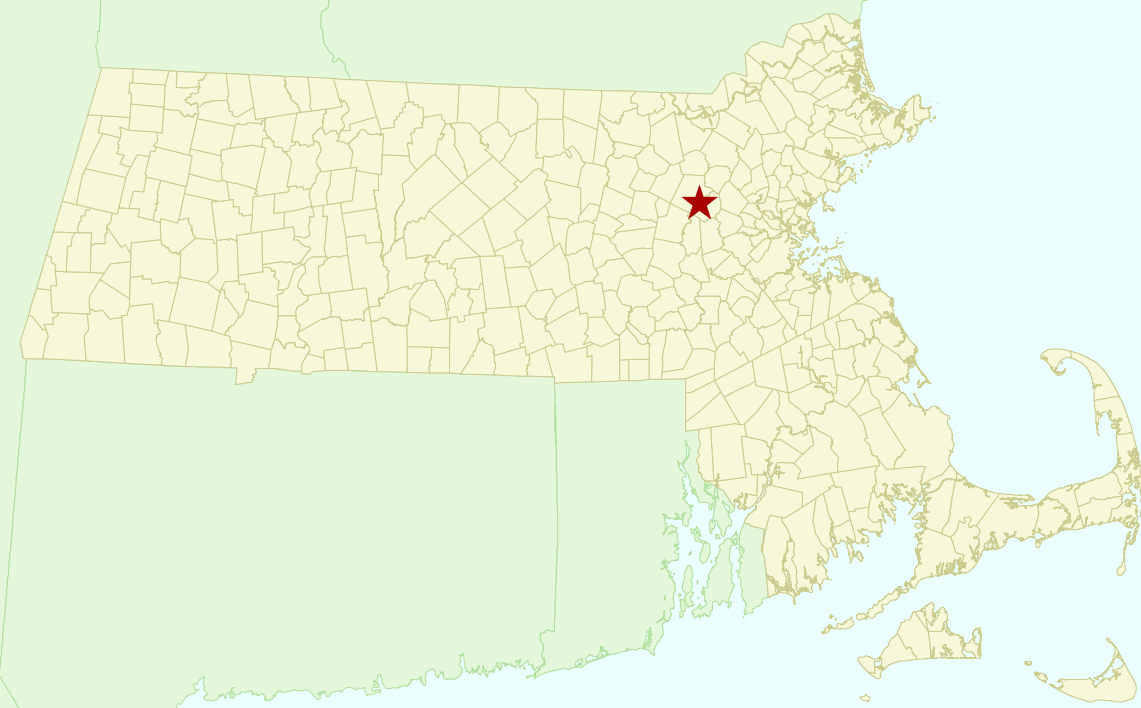

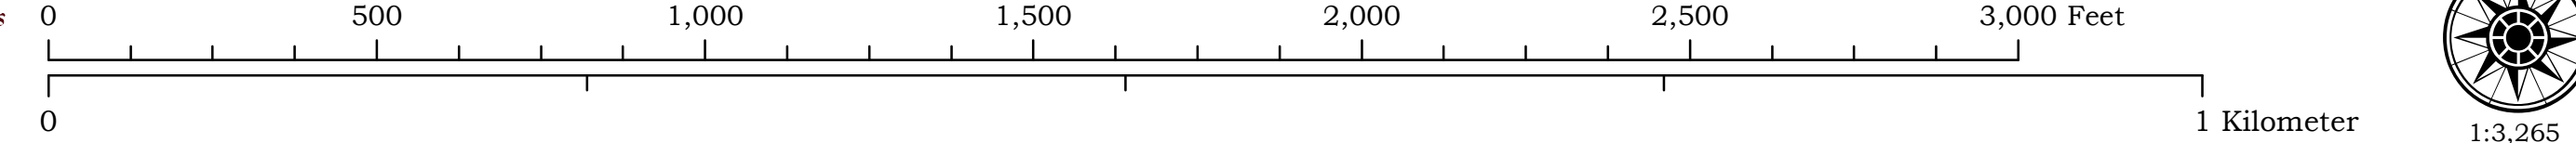

LAND SURVEYING

Of all kinds, according to the best methods known: the necessary data supplied, in order that the boundaries of Farms may be accurately described in Deeds; *Woods* lotted off distinctly and according to a regular plan; *Roads* laid out, &c., &c. Distinct and accurate Plans of Farms furnished, with the buildings thereon, of any size, and with a scale of feet attached, to accompany the Farm Book, so that the land may be laid out in a winter evening.

Areas warranted accurate within almost any degree of exactness, and the Variation of the Compass given, so that the lines can be run again.

Apply to
HENRY D. THOREAU.

DATA SOURCES

GPS Trails, Roads, and Point Features were captured by DCR GIS staff using Trimble GeoXT GPS units running ArcPad 7.0/GPScorrect 2 and differentially corrected using GPS Pathfinder Office 3.10. Trails and Roads were smoothed manually.

Walden Pond State Reservation boundaries created by DCR GIS staff using a variety of surveys, deed descriptions, sketch maps, and MassGIS orthoimagery.

Roads, Train Lines, Hydrography*, Protected Open Space, Town Lines, Elevation Contours, and other datalayers are from MassGIS. Please refer to their website for more details:

<http://www.mass.gov/mgis/>

Parking Lots, Buildings, Beaches, and other cartographic features were digitized over April 2001 MassGIS orthoimagery by DCR GIS staff.

* with the exception of Walden Pond and the wetland adjacent to Thoreau's cove, which were digitized over MassGIS 2001 orthoimagery by DCR GIS staff. Water levels vary in the ponds and wetlands shown; at times some beaches and trails may be underwater.
